THE ROBOGENIUS PROJECT ENDS:

Robogenius project is ending at the end of September 2020 after two years of cooperation and exchanges!

In August came out the masterpiece of the project and a compilation of all our achievement: the Robogenius E-book. This E-book is aiming at providing a selection of best practices, tips, and advices in teaching robotics to different audiences.

It also presents the teaching cultures of ICT in the European school systems of the Netherlands, Greece, Romania, Spain and France.

In order to ensure its further protection and dissemination, Robogenius's partners chose to register the E-book using an ISBN (International Standard Book Number): ISBN 978-2-9574131-0-2.

If you are looking for ideas in teaching ICT or robotics you should have a look at it!

Learning for empowering the new generations of EU innovators

OUR DISSEMINATION AT LOCAL LEVEL:

Despite Covid-19 pandemic, some partners had the opportunity to organise dissemination events with local stakeholders, university students, teachers and researchers in the field of the robotics.

Of course social distancing and masks were in place!

The feedbacks were really positive and enthusiastic about the quality and the angle chosen by our partnership.

The project had planned to meet one last time in Marseille in September but we had to readapt our strategy and organise an online discussion.
